## Securexam Browser

*Web-Based Exams Without Cheating.*

### Powerful, Yet Simple

Securexam Browser is a powerful, yet simple tool that secures any online test-taking environment. Securexam Browser allows you to harness all the benefits of online testing without fear of student cheating. Remarkably easy to use, Securexam Browser can integrate with your existing Course Management System (e.g. Blackboard, Moodle, etc.) by simply password-protecting your exams. Since it works just like an everyday Web browser, students will already know how to use it. You can achieve full exam security with no additional training for your students or staff. Just think, test day peace of mind is just a phone call away.

### Security Made Easy

Securexam Browser is designed to create a completely secure testing environment. With Securexam Browser, test takers can't open outside programs, web pages, or applications. They're also prohibited from communicating through instant messenger programs, accessing saved documents, taking or printing screen shots, pasting text in, copying text out, or hacking the test.

### Everyone Benefits

Teachers, students, and school administrators all benefit from Securexam Browser. Teachers can set aside concerns about exam integrity. Students know their peers aren't gaining an unfair advantage, while continuing to take exams in a familiar, comfortable online environment. Administrators don't have to worry about overly complex security systems and procedures.

### System Requirements

For PC: Windows XP, Vista, 7 (32-64 BIT)

For Mac: Macintosh OS 10.6 and higher
